

## Specific Future

On this worksheet (or in a google doc) you will create a specific future for your company based on the certainty you cultivated in Module 1.

Step 1 - Pick a Future Date 5 - 10 years from now, be specific:
Step 2 - Close your eyes and envision what your company looks like on that date in the future. Imagine everything in detail including what your office (if you have one) looks like, how much revenue is being generated, how many customers you have, what has been accomplished, what your team looks like, and what products and partnerships have been created. Also consider how you <b>feel</b> in this future, and what this future makes possible.
When you have a specific future created, write it out below <b>in the present tense</b> (ex. "I am standing in our HQ on the top floor of an office building in Springfield, surrounded by our team of 100. I feel excited because etc". Be as specific as you can so you get the picture and feeling of this future in your mind:
